FEATURES

PLUS

TECHNOLOGIES

UPPER	Water repellent and breathable full grain leather with HI - TECH fabric
LINING	PLASMAFEEL - Lining in 3D fabric that keeps the foot constantly cool and dry thanks to the instantaneous absorption of sweat and its immediate dispersion outside of the shoe. Breathable, antibacterial, resistant to wear and abrasion
INSOLE	ACTIVE - Made from recycled materials. Thermoformed in dual-density polyurethane with a tear resistant multilayer fabric. High breathability and quick absorbing thanks also to a special puncturing in the forepart, for a foot that is always dry. Antistatic, antibacterial, anti fungus, the presence of activated carbon keeps the foot free from bad smells. Complete with shock-absorbing heel support to reduce impacts on the entire spine and arch support to ensure greater comfort.
SOLE	PU/PU Dual density - BASF PUR Elastopan® polyurethane foam insole, ensures the maximum comfort and the absorption of the impact on all surfaces. Polyurethane outsole, with an elevated grip, resistant to wear, oils and hydrocarbons. System of energy absorption on the heel. It leaves no mark on the surface. SATRA UK "Pedatron Test" that certifies abrasion resistance three times greater than standard
LAST	ANATOMIC SOLE The anatomical last of the injected sole, unlike removable insoles, is inalterable for the entire lifetime of the shoe. The Anatomic sole, following the natural morphology of the foot, provides a natural support to all its points, ensuring maximum comfort
ANTI-PEFORATION MIDSOLE	SHIELD TEX - Non-metallic antistatic, flexible, anti-perforation fabric insole, built with several layers of high-tenacity fibres. Compliant with: EN ISO 20345:2022
ANTI-TORSION SUPPORT	COMPOSHANK Anti-torsion support in ABS. It is applied between the antiperforation midsole and the midsole, corresponding to the arch of the foot. It improves stability on ladders, where foot support is not complete.
ANTI-STATIC DEVICE	SILVER STRIP DISCHARGE (SSD) . Conductive cotton tape and silver threads inside the upper and in contact with the foot. It is an anti-static device that guarantees greater safety than the standard, increases the dispersive capacity of the electrostatic charges throughout the life of the shoes.
